

Command Chief®

The **FIRST & ONLY** wireless remote control system with genuine PLC chassis integration

Command Chief® raises the level of innovation of wireless remote control with the Allen-Bradley SLC 500 as the heart of the crane control system.

Watchdog
Relay Module

Communicator®

High Current
Relay Module

- * Command Chief® systems provide a complete remote control package specific to your application requirements
- * Communicator® allocates data directly to an input image table
- * Configuration to accommodate virtually any I/O requirements
- * Communicator® & Watchdog Relay Modules work together to enable the Allen-Bradley SLC500 to be a safe control platform for selected transmitters
- * Safety is the foremost goal with implementation of the Watchdog relay module providing hard-wired interface to MLC circuits
- * System components are available through Control Chief or local Allen-Bradley distribution
- * OEM's and System Integrators can purchase transmitters and Communicator® components to implement into a control design
- * Critical system monitoring for preventative maintenance and assurance of safe operation:
 - Warning of magnet left energized
 - Service required for hoist upper limit switch
 - Event recording & data logging
 - Elimination of hoist lower in safety zone
 - Automatic reduction of speeds in safety zone
